

SMTTP Beamer

A complete e-mail server with features for less cost

Do you want to move your email in house?

Tired of begging your ISP to add a new email addresses to your domain?

Have POP3 boxes all over the place?

Getting too much Spam?

Would you like to have Web mail?

Do you like a simple way to do out-of-office messages?

Do you need flexible email routing options?

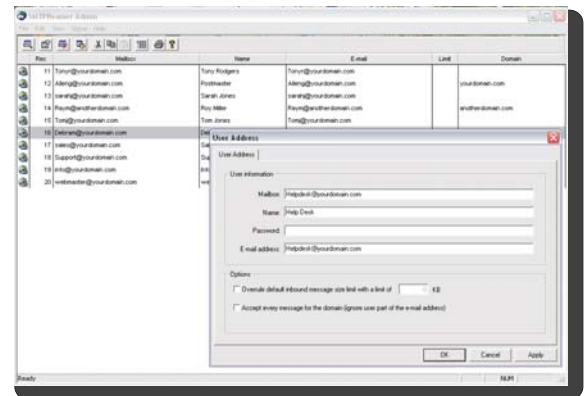

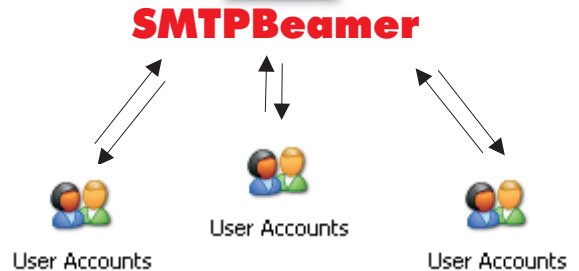

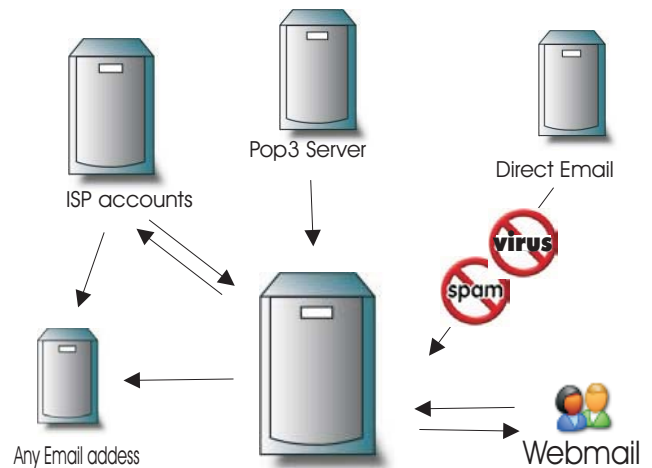

SMTTPBeamer offers a well balanced solution for small and mid-size companies at only a fraction of the cost of Exchange. It can receive SMTP mail and download POP3 accounts for single users or catch-all domain accounts.

You can create and maintain as many pop3 user mailboxes as you like.

SMTTPBeamer offers automatic routing, mail forwarding and copy-to options.

SMTTPBeamer gets rid of a lot of spam by turning on the SLS / RBL filter.

Use F-Prot, McAfee or others virus scanners to scan all incoming and outgoing mail.

Easy setup- Unlimited Users
